

Name: Alexander R. Torrijos
Position/Title: Web Developer

I. Contact Info

Address: 23 United States St., BLS Paranaque, Philippines
Phone: +63 2 822 7219
Mobile: +63 0 921 838 0382
Email: artorrijos@gmail.com
Website: <http://alex.stormwild.net>, <http://stormwild.org>
Yahoo Messenger: artorrijos
Twitter: <http://twitter.com/stormwild>

II. Personal Info

Date of Birth: March 24, 1970
Nationality: Filipino
Gender: Male
Civil Status: Single
Education: AB Interdisciplinary Studies(Chemistry, Education), Ateneo de Manila University 1992
Training: Programming courses attended (Java, C++/OOP, Linux, MS SQL, XML) NIIT(now Phoenix One), 2002-2004
Certification: Macromedia Certified Flash MX Designer

III. Employment History

Developer

Jan 14 – June 4 2010
L'Oreal Philippines (thru Antonio Rivera Consulting Inc.)

Project Experience

Reportorial Requirements: Maintenance and enhancement, Developer

Developed reports downloaded as Excel files with data from the SQL Server 2000 database. Developed the Excel file using NPOI Excel library a .NET port of the POI Apache Excel library for Java. Web Forms .NET 2.0. Extensive use of SQL Server DTS packages and construction of Stored Procedures mostly using dynamic SQL and UDFs (user-defined functions)

Roles: .NET Developer, SQL Server Database Developer,

Environment/Development Platform: .NET 2.0- 3.5, SQL Server 2000 Enterprise, Visual Web Developer, ,SQL Server Management Studio Express, Enterprise, Manager Query Analyzer, DTS

Developer

May - December 2009
Fonterra Brands (thru IT Managers Inc.)

Project Experience

Nutrition Clinic Application: Enhancement and new functionality, Developer

Enhanced existing weight/height chart tool by converting the existing HTML and Javascript application to a web based .NET 3.5 and SQL Server 2008 Express application. Developed additional Food and Activity Chart tools. Developed a Flex front-end and integrated it with a .NET web service. Developed saving information to the database and exporting the data as an Excel (CSV) file. Used a LINQ query to populate a collection used as a datasource for a GridView. Developed tables, views and stored procedures required by the application. Designed and developed the MasterPages, Themes, animation and graphics used by the application.

Roles: .NET Developer, Flex Developer, Web Designer, Web Developer,

Environment/Development Platform: .NET 3.5, SQL Server 2008 Express, Visual Web Developer, ,SQL Server Management Studio Express, IIS 5.1, Flex 3 Builder, Flash CS4 Professional, Photoshop, Illustrator

Software Engineer

November 20, 2008 – January 15, 2009
PointWest Technologies Corp.

Project Experience

Ticketing Application: Maintenance, .NET Developer

Enhanced existing ticketing web application by implementing additional functionality within a team environment. Assigned to implement displaying and saving data through web forms. Worked on an xml uploading functionality parsing the data from the xml and saving it to the database.

Roles: .NET Developer

Environment/Development Platform: .NET 2.0, MySQL, Visual Studio 2005

Consultant (Developer)

Nov 2007 – May 2008
Seer Technologies Inc.

Project Experience

Seer Internal: Pre-Work, Developer (Mar 2008 to May 2008)

The pre-work involved development of an upload facility for an excel file which serves to provide template data for a dashboard application. I was able to develop the functionality working within the application's framework which utilizes JSF, Spring, iBatis, Acegi, Log4j, Oracle 10g database. I developed the JSF page which provided the UI for the file upload and I coded the Managed Bean, the facade classes, the DAO classes and the DAO implementation classes as well as the iBatis sql mapping files which are XML files. I also edited the JSF faces-config.xml for the navigation of the pages as well as Spring applicationContext.xml file to provide the facade classes to the bean and dao's to the facade. The managed bean processes the file and saves it to the server file system. Once the file is saved I used the Apache POI-HSSF library to process and parse the excel file and saved the contents to the Oracle database.

Roles: Developer

Environment/Development Platform: J2EE on Eclipse IDE (Europa), Oracle 10g, SQLDeveloper

Seer Client: Guest Relationship Management Application, Developer (Nov 2007 to May 2008)

The Guest Relationship Management application forms part of an online web application provided by Client to its customers and which provides Hoteliers with the ability to provide special privileges and benefits to guests of their property thereby increasing customer loyalty. I was assigned to the project during the middle to later stages of construction and contributed to the project by developing the Account Admin module using the Zend Framework. The module provides authentication and management of account clients. I also developed a custom template system using the Zend Framework. I also implemented the template system provided by the client. I applied the template styles provided by the client to the pages of the application. I also assisted in implementing navigation UI functionality and contributed to cross-browser functionality of javascript used in

certain pages.

Roles: Developer

Environment/Development Platform: PDT on Eclipse IDE (Europa), Dreamweaver CS3, WAMP, SQLYog

Developer

Oct 2006 – May 2007

Antonio Rivera Consulting

Project Experience

L'Oreal Philippines: HR Intranet Portal, Developer (Nov 2006, May 2007)

The project required the conversion of their printed Employee handbook to a digital format accessible only to their employees. As the developer, I was present in meetings to outline requirements for the project and followed the requirements document prepared by the Project Manager. I implemented the conversion of the design provided by the client to XHTML and CSS. The application was developed using the .NET 2.0 framework and SQL Server 2005. The Membership API, MasterPages, and Sitemap features of the framework were used. Adobe Flex 2.0 was used to develop the Flash application which loaded and displayed the HTML files which made up Employee handbook content. A simple Flash animation was also developed. I integrated a third-party poll/survey application converting the VB .NET code to C#. I also implemented the user management functionality using a third party wrapper class for the Membership API.

Roles: Developer

Environment/Development Platform: .NET 2.0, SQL Server 2005, Visual Web Developer Express and SQL Server Management Studio

Summary of Other Work Experiences

After graduating from college I worked as a grade 5 classroom teacher for Ateneo Grade school from 1992-1996. I then worked for a medium-sized bank as a branch cashier/assistant manager from 1997-1999. I then shifted to working as a graphic designer in various graphic design studios until 2002 where I then worked as a tech support engineer for Macromedia (thru Sykes Asia) up until

2004. During this time I was able to attend several programming courses at NIIT and have since then worked on various projects as a web designer and developer for various companies including working for ePLDT as a web developer from 2005-2006.

IV. Skills Profile

Technologies/Tools/Processes

Proficiency Level

0 – no experience

5 – expert

General	Proficiency
Design Patterns	2
GUI Design	3
Internet Development	3
OO Analysis and Design	3
Source Control Tools (SVN)	2
Programming for Operating Systems	
Linux	2
Languages and Technologies	
.NET (1.1 - 3.5)	3
Ajax	2
AWT/JFC/Swing	2
C++	1
C#	3
CSS	3
DHTML/Javascript	3
HTML/XHTML	3
Actionscript 2.0 & 3.0 / Flex	3
Java (General Language Knowledge)	2
PHP 5	3
PL/SQL	2
T-SQL	3
SOAP	1

Sockets	1
Spring Framework	1
Zend Framework	3
Databases	
MS SQL Server (2000-2008)	3
MySQL	2.5
Oracle 10/11g	2
Application Servers	
WAMP/LAMP	3
Apache Tomcat	2
